Hypertension

DEMO REFERENCE: simplified, original text written only to test this software. It is general information and not medical advice.

Causes of secondary hypertension

- Renal: chronic kidney disease, glomerulonephritis, renal artery stenosis.
- Endocrine: primary aldosteronism, Cushing's syndrome, pheochromocytoma, thyroid disease.
- Drugs: NSAIDs, oral contraceptives, corticosteroids, decongestants.
- Other: coarctation of the aorta, obstructive sleep apnea, pregnancy-related hypertension.

Complications of hypertension

- Brain: stroke, hypertensive encephalopathy.
- Heart: left ventricular hypertrophy, heart failure, coronary artery disease.
- Kidney: chronic kidney disease.
- Eye: hypertensive retinopathy.
- Vessels: aortic dissection, peripheral arterial disease.

Bronchial asthma

DEMO REFERENCE: simplified, original text written only to test this software. It is general information and not medical advice.

Management of bronchial asthma

- Avoid triggers and educate the patient.
- Relievers: short-acting beta-2 agonists (for example salbutamol) when symptoms occur.
- Controllers: inhaled corticosteroids, alone or combined with long-acting beta-2 agonists.
- Add-on options in severe disease: leukotriene antagonists, biologic therapy.

Treatment of acute severe asthma

- Oxygen to maintain adequate saturation.
- Nebulized short-acting beta-2 agonist.
- Systemic corticosteroids.
- Consider intravenous magnesium sulphate in severe or life-threatening cases.
- Arrange urgent hospital care and monitor closely.

Heart failure

DEMO REFERENCE: simplified, original text written only to test this software. It is general information and not medical advice.

Causes of heart failure

- Ischemic heart disease.
- Hypertension.
- Valvular heart disease.
- Cardiomyopathy.
- Arrhythmias such as atrial fibrillation.

Clinical picture of left-sided heart failure

- Exertional dyspnea, orthopnea and paroxysmal nocturnal dyspnea.
- Fatigue.
- Cough, sometimes with frothy sputum in pulmonary edema.
- Basal crackles and a third heart sound.
